About the 3rd Global Conference on Agriculture, Food and Nutrition Security and Climate Change

Hunger is the biggest obstacle in the way of development, progress, prosperity and peace in the world. Africa on the other hand has 60% of the Earth's uncultivated arable land. The aim of this Conference is to build on the progress already made and to concentrate on ways to alleviate poverty, to find new ways to feed the world and deal with the impact of climate change.

The 3rd Global Conference on Agriculture, Food and Nutrition Security and Climate Change website offers a detailed day to day programme and provides a great deal of useful information. For more details go to <http://afconference.agric.za>
